PROJECTS

Online Event Management

ROLE :- Full-Stack Developer (HTML, CSS, JavaScript, Email Integration Logic)

I designed and coded this fully functional event management tool from scratch to demonstrate my skills in core web technologies.

Library Management System

ROLE :- I am the solo Software Engineer responsible for the entire system's design and implementation.

I developed the logic for dynamic array manipulation, including functions to search for available space when adding a new book, and shifting elements when a book is removed.(JAVA, JDBC , SQL).

Music Application

ROLE :- I am the solo Android Developer responsible for the entire system's design and implementation.

A fully functional music playback engine that scans the local device library to populate a dynamic playlist. Includes robust user controls for Play, Pause, Next, Previous, and a Repeat One feature to loop the currently playing track.
